DETAILED ACTION

Applicant's election without traverse of Group I, claims 1-5 in Paper No. 7 is acknowledged. In response to Amendment A (Paper No.7), claims 6, 11 and 16 now read on the elected invention and will be examined along with claims 1-5 of Group I. Although claims 21, 26, 27 and 29-42 refer to claim 1, they are considered patentably distinct inventions from Group I because the methods could be carried out with a materially different product. Therefore, these claims properly belong in IX for example. Claims 7-10, 12-15 and 17-43 have been withdrawn from further consideration on the merits as they are drawn to a non-elected invention.

Upon further consideration, an election of species is in order.

Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention: a) sesquiterpene lactone, b) diterpene lactone + triterpene species and c) compound which conjugates (as in claim 3) d) additional component (claim 5).

Art Unit: 1654

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for each of the above-mentioned genus for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 3, 5, 6, 11 and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1654

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Patricia Patten, whose telephone number is (703)308-1189. The examiner can normally be reached on M-F from 9am to 5pm.
